

EXPANDER DESIGN SUITE

Business your way

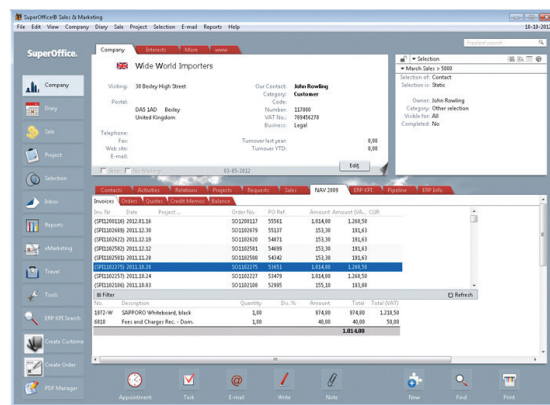

SuperOffice CRM is not a customized system. It is a one size solution designed to fit all. But all companies have individual needs when it comes to efficiency, customer overview, insights, workflow processes, intelligence etc.

With Expander Design Suite (EDS) you can tailor your SuperOffice CRM to fit your specific needs. Use this designer tool to build and enhance your software as well as your business.

Business your way

EDS is a tool box module designed for professionals who want to make a smart solution excellent. Deploying EDS will expand your SuperOffice to fit your needs and enable you to enter and view external data in your usual CRM environment.

The design possibilities with EDS are practically limitless. However, our clients use this tool mainly to create customized dashboards, financial data integration, support & complaints handling procedures, and sales solutions that focus on selected features.

Navision integration via tab showing customer invoice history etc.

Features

- ★ Selected data from external systems can be displayed directly in SuperOffice, e.g customer invoices
- ★ Enter data directly in EDS
- ★ No limitations on data volume or source - practically all types of data are suitable incl. pictures and charts
- ★ Advanced search function for limitless data combination
- ★ Adding and editing of data can be done online and via Travel
- ★ Imported data is displayed via extra tabs fully integrated in your usual SuperOffice environment

Your benefits

- ★ Redesign SuperOffice to meet your specific needs
- ★ Combine selected external and internal data for enhanced business overview and insight
- ★ Reduce license expenses by showing e.g accounting information directly in SuperOffice
- ★ Identify hidden strengths and opportunities by combining data in advanced searches
- ★ Easy upgrade to new SuperOffice versions
- ★ No programming needed - low cost of ownership
